

# TRIOLET PROFOTO ADAPTER

## New Profoto Adapter from Chimera Lighting Makes the Triolet Even More Versatile

**Boulder, CO July 2016** - With the line between motion and still-content creators blurring more everyday, Chimera Lighting is proud to announce the release of the revolutionary Triolet to Profoto Adapter.

Easily attached to the massively popular Triolet, a very price-point approachable continuous light fixture that can accommodate up to a 1000-watt bulb, this adapter allows you to use the light with Profoto’s wide array of light-shaping tools from reflectors to beauty dishes, and more.

Previously only compatible with speed rings, this adapter adds to the Triolet’s versatility by allowing Profoto users to continue using their legacy gear to create their own stylistic lighting setups. Constructed from solid 6061-T6 aluminum alloy, the adapter is designed for long-lasting durability, standing up to even the hardest working creatives.

- Compatible with Profoto Light-Shaping Tools
- Solid CNC Machined 6061-T6 Aluminum Alloy
- Long-Lasting Durability
- Anodized Blue Finish
- Ideal for rental houses or studios already invested in the Profoto system.
