BIRDCAGE

Chimera's Lanterns deliver practicality, durability, and simplicity for solutions in portable omnidirectional soft lighting. Chimera Lanterns are recognized for their portability, ease of use, and durability.

Lanterns can be set up with any speed ring from the Strobe and Video Pro Lightbank family. For maximum omnidirectional effectiveness, it is recommended to use with a "bare bulb" type lighting fixture like the Chimera Triolet. Hook & Loop-attached skirts can be utilized to selectively block light.

- Portable, and durable omni-directional soft lighting
- Central soft light for round-table interviews and for filling interior shooting spaces with soft, ambient light
- Standard and Pancake Lanterns can be set up on any Speed Ring from the Strobe or Video PRO Bank category
- Hook & loop-attached skirts can be used to selectively eliminate spill

Styles available:

Standard Lantern – 20" and 30" sizes. Skirt adjusts to cover $\frac{1}{4}$ and $\frac{1}{2}$ lantern providing optimal light control.

Pancake Lantern – Small, Medium, and Large sizes. Flat-top for space-efficiency when light is centrally needed for roundtable interviews or other interior shooting spaces. A zippered four-panel adjustable skirt allows for fine tuning of light fall-off.

Birdcage Lantern – Versatile small area light source 14" tall with a built in mogul base fixture for 500 watt lamps, and a screw in adapter for use with standard medium base lamps. Stand it up, hang it, lay it down, or mount it onto a stand.
