LIGHTBANKS FOR STILL PHOTOGRAPHY

SUPER PRO

PRO II

MINI/MAXI

Super Pro X Lightbanks have a removable recessed front screen to control lens flare and a choice of silver or white interiors.

Available in standard and strip shapes, Super Pro X lightbanks offer customization with a massive range of accessories including fabric barndoors, metal honeycomb grids, and collapsible fabric grids as well as optional 1/2 Grid and 1/4 Grid front diffusion screens.

Pro II Lightbanks have a sewn in front screen that is flush to the edges of the lightbank for softer edge transfer on the subject and a clean catchlight or reflection. Available in standard and strip shapes, with a white interior.

Mini and Maxi lightbanks are designed for use with a portable (on-camera type) flash. With a sewn-in front screen and silver interior, the Mini and Maxi lightbanks are ideal for work in small spaces when only slight softening of your flash is desired. Because of its small size and silver lining, the light quality will be more specular with a faster gradation from highlight to shadow areas, than with a white-lined softbox.

Key Features

- Durable Chimera construction
- Five-Year Warranty against defects
- Integrated rear flaps fold over speed ring to prevent light leak
